TRAINING

Solutions to optimize your staff's efficiency so they can concentrate on your business

Your operators and maintenance personnel contribute to your productivity on every portion of your line. Let Panasonic share years of knowledge as a world-class manufacturing organization to help you reduce downtime and minimize scrap and rework.

Smart Factory Solutions for

any mix any volume®

EQUIPMENT TRAINING SOLUTIONS

Operator training for Panasonic electronics assembly and microelectronics equipment features courses designed to improve personnel performance and increase Overall Equipment Efficiency (OEE) as well as the overall line. Participants will gain the necessary experience and skills to ensure optimum performance.

Basic Operations Module
Machine setup, operations and basic machine processes, and troubleshooting. (4–4½ days)

Advanced Corrective Maintenance Module
Our advanced-level maintenance and troubleshooting for the experienced technician. (4½ days)

ITF Feeder Maintenance Module
All aspects of feeder care including inspection, cleaning, preventive maintenance, and calibrations. (1–2 days)

Custom Modules
Individually packaged modules that target your specific requirements.

SOFTWARE TRAINING SOLUTIONS

PanaCIM Enterprise Edition MES (Manufacturing Execution System) software training provides comprehensive instruction and hands-on experience in everything from the basics of PanaCIM and module specifics to advanced use. Designed for IT personnel, engineers, and technicians.

PanaCIM Basics
The essential building block for all PanaCIM-related tasks. (5 days)

PanaCIM Installation & Base Configuration
Service installation and MES system configuration tasks. (5 days)

PanaCIM Modules
Individually packaged sessions that target your needs for the utilized modules. (2–5 days)

PanaCIM Advanced
Advanced level troubleshooting for the experienced user. (5 days)

PanaCIM®
Enterprise Edition

PROGRAMMING TRAINING SOLUTIONS

We also offer production program creation software training, allowing personnel to get up to speed on generating, modifying, and optimizing production programs for Panasonic SMT equipment.

Basic DGS (Data Generation System)
Comprehensive training to convert CAD data into products and optimized production programs including parts library editing for NPM-, AM-, CM-, and DT-series machines.
(5 days)

Advanced DGS
Customer-selected advanced items targeting your specific programming needs to include advanced-level options, odd-part teaching, parts editing, etc.
(2-5 days depending on selections)

PanaPRO
Comprehensive training to convert CAD data into products and optimized production programs including parts library editing for Panasert and CM- and DT-series machines.
(5 days)

Expert and Effective Training Solutions derived from over 50 years of exceeding customer needs with proven industry excellence... and over 100,000 solutions installed

Classes are held in our new cloud9 Innovation Center featuring Panasonic equipment and our nearly forty complementary technology company partners... All integrated via PanaCIM Enterprise Edition software.
