# rebuilt placement head solutions

refurbishment  
solutions

Ensure that your Panasonic machine maintains the highest placement accuracy by exchanging your current placement heads with Panasonic Certified Rebuilt Placement Heads.

Panasonic Certified Rebuilt Placement Heads increase your productivity exponentially:

- Reduced maintenance overall, increased time for your production
- Decreased downtime means higher profits
- Only 100% OEM parts are used
- Increased accuracy by 45% when included with a field tune up
- No work needed on your end—each head is rebuilt by factory-trained and certified engineers
- Pure Panasonic quality—no third parties or sub-contractors involved

Part Numbers for Rebuilt Placement Heads

CM402 (individual head: light)	RN610007613AA
CM402 (individual head: heavy)	RKXFY002LA00
CM402 (individual head: multi-function)	RKXFY005AA00
MSR machine (individual head)	R104671010016
MSR machine (set of 16 heads)	R104671010016S
MV2F, MV2V machines (individual head)	R104271010009
MV2F, MV2V machines (set of 12 heads)	R104271010009S

# the Panasonic Quality Guarantee

Each head is completely disassembled to its basic parts, cleaned, inspected and reassembled using a 30-point inspection check sheet to ensure every head meets factory specifications. After assembly, each head is completely calibrated to original factory specifications.

#### Calibration items include:

- Detailed inspection of core unit
- Replacement of worn parts
- Tolerance testing
- Vacuum testing
- Assembled to factory specifications with genuine Panasonic parts
- 90 day factory warranty

We understand the challenges manufacturers face in today's marketplace and we welcome the opportunity to put our **experts in productivity** to work for you.

No other factory automation provider offers you more productivity, more support, more experience or more solutions.
